OBJECTIVE

To obtain a position of Project Manager, Architecture or Interior Design.

EXPERIENCE

Project Manager – Responsible for scope definition, design, master planning, supervision of construction documents, project budgeting, budget monitoring, client contact, quality assurance, construction administration, management and coordination of staff and consultants.

Project Coordinator – Interfacing with Department Heads and Directors of Sea World of Florida for preparation of schematic designs, selection of architects and contractors, bidding, construction administration, and project closeout.

Architectural Technical Specialist – Construction Management responsibilities for Universal Studios Florida: review of construction documents, determine conflicts, develop solutions and coordinate their incorporation with the Architect of Record. In addition, research building code conflicts and review with the city, generate Modification Documents, follow-up of contractor generated RFI's, NCN's and quality control for buildings and area development.

Interpersonal – Developing a positive relationship with clients, consultants, and building officials. To maintain a team-mindset to maximize the skills and cooperation of all team members involved.

Design and Production – Experienced with AutoCadd 2009, Revit 2009, SketchUp, hand sketching techniques and delineation.
