

# F.S. 481 - Reciprocity

The architect's comprehensive education and training encompass the impact of design and technology on the health and well-being of the public and on the built and natural environments. Currently F.S. 481 provides Florida's citizens with the security of knowledgeable architects designing the very spaces they live, work and play everyday.

Reciprocity rules are in place for those architects that are licensed in another state, but wish to work within Florida. **Chapter 481 allows for the best trained architects to provide good design in the state.**

**AIA FLORIDA OPPOSES ANY CHANGES TO FLORIDA STATUTES CHAPTER 481**

As today's world continues to grow and make new leaps into the newest technology and greatest visions architects are required to keep up. The Statutes require that architects continue their education, beyond their degree and internship, and maintain a knowledgeable base of the Florida Building Code as well as codes established by municipalities and counties.
