SCHEDULE

	GRAY (40)	JOYCE (50)	BEAUFORT (30)	BECKETT (40)		
12:00 PM						
12:30 PM	Conference Attendee Check-in/ Lunch in Expo Hall					
1:00 PM	Inclusive Playgrounds: Designing Spaces	Advanced Florida Building Code	Building Enclosure Control Layers Fundamentals			
1:30 PM						
2:00 PM	Roofing Wind Speeds		Concrete Waterproofing and Protection	Design Awards Submission: Tips & Best Practices		
2:30 PM						
3:00 PM	Break - Refreshments in Expo Hall					
3:30 PM	Design for Disassembly Virtual Tour	Reducing Embodied Carbon	Designing with Metal Ceilings	Rust Prevention 101		
4:00 PM						
4:30 PM	High-Performance Passive Fire Protection Solutions	Architectural Structural Deck: A Functional Focal- Point	Using Aluminum Extrusions to Create Sustainable Facades	Architectural Powder Coatings		
5:00 PM						
5:30 PM	Break - Refreshments in Expo Hall/ CAREER HOUR with Students 5:30-6:30 PM in Swift					
6:00 PM	Annual Meeting & Lecture Reception					
6:30 PM	Annual Meeting & Election of Board Members Keynote Speaker: "Shaping the Public Realm": 1 CEU (LU) Paul Mankins, FAIA, LEED AP - substance architecture (Atrium)					
7:00 PM						
7:30 PM						
8:00 PM						
	Conference & Expo Closes					

ADDITIONAL PROGRAMMING

12:00 PM – 4:00 PM

Student Project Exhibit (ATRIUM)

4:30 PM – 5:30 PM

Student Conversation & Q&A with Paul Mankins, FAIA, LEED AP (ATRIUM)

5:30 – 6:30 PM

Career Hour (SWIFT)

Students looking for internships and career opportunities will bring resumes, ready to meet firms and companies with open positions and placement opportunities.

12:00 PM – 4:00 PM

‘Art Speaks: A Celebration of Black Architects’ Exhibit (YATES)

Architecture is both an art and a science; a process where one can dream up an idea, and apply a series of tried-and-true methods to make it a reality. Architecture has many contributors that have reimagined, critiqued, and shaped the built environment to what it is today. This exhibit will celebrate the contributions that African Americans have given to this field. A journey introducing historical figures, presenting more recent works from today’s Black Architects, and bringing to light student’s work, showcasing what can emerge out of a future generation of Black Architects.

Presented by Black Architects in the Making – Orlando.

SESSION DESCRIPTIONS

GRAY

1:00 PM Inclusive Playgrounds: Designing Spaces to Bring Children & Communities Together (HSW)

Play is more than fun and games—it is an essential component in helping children develop critical physical, mental, emotional, and social skills that lay the foundation for adulthood. Inclusive play breaks down barriers and builds community through fostering understanding of our similarities and differences. This course discusses how play impacts child development and describes the options and considerations for designing an inclusive playground that benefits all children and the community.

Presented by Top Line Recreation.

2:00 PM Roofing Wind Speeds (HSW)

In the industry there is a need to sort out the confusion between building codes, uplift rated assemblies, and warranties by explaining what each offer and how they should be considered. To understand the building code, we need to review how uplift is determined and the industry's accepted rating method of roofing assemblies for comparison. After understanding the code criteria, discussion will focus on how roofing warranty wind speed coverage is Regarded by the industry and building code will be reviewed for clarity.

Presented by Compass Sales Group.

3:30 PM Design for Disassembly Virtual Tour (HSW)

Manufactured construction supports customized prefabricated solutions for interior spaces. It's innately sustainable and Designed for Disassembly. The key is technology. Real-time, interactive 3D software integrates with CAD, Revit, and manufacturing software, bridging the gap between the client design team and the manufacturer. This results in high-performance interiors that keep their value over time. Especially suited to projects where cost, quality and schedule certainty are of the essence, this type

of construction promotes safety at the project site and can be specified to contribute to better indoor air quality. It also offers environmental sustainability, design control, and the ability to integrate technology seamlessly into the space.

Presented by SHIFTT.

4:30 PM High Performance Passive Fire Protection Solutions (HSW)

The ICC International Building Code (for new buildings) and International Fire Code (for existing buildings) outline the fire resistance and allowable flame spread and smoke development characteristics of building materials used for structural and interior finishings, based on location and occupancy type. This course provides an overview of the most current Code Compliant Intumescent Fireproofing and Fire Retardant (Passive Fire Protection) Solutions for structural steel, structural lumber, engineered wood, firewalls, interior furnishings, fabrics, plastics and fiberglass.

Presented by Global Fireproof Solutions.

JOYCE

1:00-3:00 PM Advanced Accessibility Compliance - The Good, The Bad, The Ugly - Or Why Did I Do That???

2 HR Advanced Florida Building Code

This Advanced Building Code course addresses the specific requirements of the Florida Accessibility Code for Building Construction and the ADA. The course will instruct attendants in the common errors that have and are occurring in construction relating to accessibility issues. There will be an update as to what the Federal Access Board and the Department of Justice is looking at as it relates to requirements for accessibility. When the course has been completed attendant will have a better understanding of the applicable accessibility requirements and the areas to be watchful of. **Presented by Larry Schneider.**

3:30 PM Reducing Embodied Carbon (HSW)

Sustainable buildings are crucial to the future of the human race and societies at large. The embodied carbon (EC) content of buildings in their structures and systems can be a tremendous contributor to the Global Warming Potential (GWP) of a building as a final product. There are numerous decision points in the process of visioning and designing a building at which the EC content can be reduced dramatically, enabling us to build with far less impact on global warming than is currently the case. EC will be defined and the sources of EC in buildings from a structural engineering and mechanical, electrical, and plumbing systems perspective presented. The discussion will include recent research on buildings and embodied carbon, focusing on increasing sustainability. Presenters will demonstrate how engineers, architects, and owners can leverage their roles and the available tools to reduce the EC content of their buildings. Includes options for EC reduction and contributions of Architecture 2030 and the SE 2030 challenge.

Presented by TLC Engineering Solutions.

4:30 PM An Overview of Architectural Structural Deck: A Functional Focal-Point for Modern Aesthetics (HSW)

This course will go into detail on long-spanning metal floors and roof decking. The deck profile has unique architectural aesthetics as well as acoustical that will be shown throughout the presentation. Lastly, this course will cover architectural screens.

Presented by Epic Metals.

BEAUFORT

1:00 PM Building Enclosure Control Layers Fundamentals (HSW)

This course covers the basics of building enclosure control layers: how roofs, walls, and below-grade systems manage heat, air, bulk water, and vapor. Implications of the 2015 International Energy Conservation Code with respect to the building enclosure will be reviewed with specific attention on continuous air barriers, continuous insulation, and window to wall ratio.

Presented by Terracon.

Need a transcript for your CEU's?

Scan this QR code AFTER you have completed your courses and submit the survey for credit!

2:00 PM Concrete Waterproofing and Protection (HSW)

Following a brief review of concrete ingredients, work results and sustainability the course examines causes of concrete deterioration and effective concrete protection via epoxy coatings, waterproof traffic coatings, and water repellants. For each protective treatment, relevant standards, salient characteristics, selection criteria, and drawing and specification consideration are discussed. Participants will come away with knowledge of how to extend the useful lifecycle of new or existing concrete structures.

Presented by Pecora Architectural Weatherproofing.

3:30 PM Designing with Metal Ceilings (HSW)

The most common suspended ceiling in use today is the white acoustical ceiling found in most commercial spaces. As Architects and Designers seek ways to add interest to spaces such as lobbies, libraries and retail spaces, metal ceilings are becoming more common in construction projects on their own, or in conjunction with other ceiling materials. Metal ceilings offer a wide range of colors and finishes; they aid in acoustics, and they are available in many sizes and styles. This presentation will introduce the participant to common metal ceiling systems, while covering design considerations such as panel type, size and finish among other things. The presentation will end with common considerations for specifying a metal ceiling. **Presented by Rockfon.**

4:30 PM Using Aluminum Extrusions to Create Sustainable Facades (HSW)

This CEU will introduce you to extruded aluminum cladding – what it is and its various internal and external applications. We will talk about the materials and processes required to make powder-coated aluminum cladding – including how it can help minimize environmental impact, increase energy efficiency and help projects earn LEED credits. We'll also address health and safety with respect to the manufacturing, powder coating and installation of aluminum cladding, share how wood finished aluminum cladding can enhance buildings and make them more inclusive and healthy environments and

discuss the fundamentals of aluminum cladding systems including the basics of installation and the various component pieces and applications. Lastly, we will share some case studies from various residential and commercial projects.

Presented by Longboard Architectural Products.

BECKETT

2:00 PM Design Awards Submission: Tips & Best Practices

Join representatives of the Design Awards Committee to learn about the logistics of how to submit a project to the Design Awards, what is required in a submission, and best practices for making your submission as strong as possible.

Presented by the AIA Orlando Design Awards Committee.

3:30 PM Rust Prevention 101 (HSW)

During this one-hour presentation, we explore the rusting process and how it relates to structural integrity, life-cycle, and safety. We review rust prevention strategies, surface, preparation, and specific coating types.

Presented by Rust Oleum.

4:30 PM Architectural Powder Coatings (HSW)

This presentation will help you better understand powder coating, how it differs from liquid and it's history. The powder-coating application process and how it works to conserve resources and to a healthier and more sustainable facet of the building industry will be discussed. Lastly, architectural applications and testing relating to powder coating and how this technology increases durability and reduces waste will be touched upon.

Presented by Sierra Pacific Windows.

COMPONENT STRATEGIC GOALS

Through discussion and consensus, the following goals were recommended to advance the mission statement:

I. ENGAGEMENT

Facilitate the experience members want from the component through events, opportunities, benefits and services. Focus and align programs, services, structures, and resources to develop innovative solutions to Central Florida's most pressing challenges.

II. EMPOWERMENT

Knowledge is our currency. Generate, curate, and disseminate knowledge required for success. Equip architects for success by transforming architecture education, expanding access to the profession, cultivating a learning culture, and developing leadership.

III. ADVOCACY

Represent the interests of architects and architecture in the communities of Central Florida through grassroots advocacy.

IV. LEADERSHIP

Provide leadership in the community and maintain a nationally recognized component. Collaborate with design and construction professionals, community leaders, political partners, and stakeholders.

MESSAGE FROM THE PRESIDENT

Dear Fellow Members, Colleagues, and Friends of AIA Orlando,

I pray this message finds you all in good health. The state of the AIA Orlando is healthy, both in membership and fiduciary responsibility. AIA Orlando contributed more to the Florida Architects Political Action Committee (FAPAC) than any other component in Florida, not just the most this year, but the most ever contributed by AIA Orlando.

In 2022, FAPAC, in concert with AIA Florida's legal team, successfully defended your right to practice architecture under the title of Architect. This team also defended the practice of architecture from another attack on the Consultant's Competitive Negotiation Act. In addition to supporting the Architect Education Minority Assistance Program, we successfully supported laws protecting architects from personal lawsuits relative to the statute of repose chapter 558 proposed deletion.

This year, firms have seen a significant increase in billings and work. I would like to take the opportunity to thank YOU for your continued support of our Chapter and profession. I believe it is important for us to remain connected and supportive in both good times and bad; your AIA Orlando board and staff remain committed to providing and demonstrating your value.

One mission we feel strongly about is our foundation, The Orlando Foundation for Architecture, and helping to create our very own Orlando Center for Architecture and Design (OCAD). We have aligned ourselves with the Friends of Casa Feliz to be our interim home while OCAD is in development.

Thus far in 2022, AIA Orlando continues to provide outstanding value and service to members in the following ways:

- Growing the membership including record participation in events
- Record level of 2+2+2 scholarship funding for Valencia College, UCF, and UF CityLab students
- Continued support of an Equity, Diversity & Inclusion (EDI) committee that seeks to transition toward a more equitable, diverse, and inclusive business model.
- The Academic Alliance Committee has strengthened our relationship and collaborations with our local educational institution partners
- The committees of emerging, healthcare and women professionals provide amazing values through a bountiful number of innovative programs

Our Chapter has accomplished many great things this year. We continue to demonstrate value and generate fellowship with our Road Tour, but we cannot do this without you. Please lend us your time, talents, and interests, for with you, we are stronger.

Until next time, please engage, volunteer, and attend.

BOARD NOMINEES

Itzel Lozada, AIA

Vice President/President Elect (3 Year Term)

With over 25 years of combined experience as designer, architect and project manager, I've had the privilege to work on many projects throughout the state of Florida. I'm initially from South Florida where I began my studies and career as a young architect, then moved to West Palm Beach after completing my Master of Architecture from FIU, before residing permanently in Orlando with my family. These opportunities have afforded me the ability to work in different settings with many diverse groups to create uniquely adaptable spaces; with the shared goal that each would impact its users and participants in special and positive ways. In 2021, I joined Bermello Ajamil & Partners (BA & Partners) as Senior Project Manager to run their healthcare projects with the end goal of helping grow the Orlando office and healthcare market presence.

Gabriel Auffant, AIA, NCARB, LEED AP BD+C

Secretary (2 Year Term)

I was born and raised in Central Florida, and I am very happy and proud to call it home. I am a registered Architect in the State of Florida. I am a graduate of the University of Florida College of Design, Construction and Planning with a Bachelor of Design in Architecture and a Master of Architecture. My 15 years of experience have been dedicated to healthcare design and creation of healing environments within the health continuum of care.

Lindsey Piant Perez, AIA, LEED Fellow, GGP, Fitwel Amb.

State Director (2 Year Term)

Lindsey Perez is an architect with nearly twenty years of experience. After spending 17 years with DLR Group, she recently moved to Amazon Fresh as a Senior Sustainability Architect working in the Standards and Concepts team infusing sustainability into Amazon Fresh stores across the country towards the Climate Pledge. Lindsey is a resource for sustainable and resilient design thinking and as a LEED Fellow has worked on a variety of third-party certified projects both private and public sector work.

BOARD NOMINEES (Continued)

Ken Linehan, AIA**Director At Large (2 Year Term)**

Ken Linehan is a Managing Principal at FK Architects in Winter Park. He has worked nationally and internationally on housing and hospitality projects. Along with numerous locations in Florida, his current projects take him to Las Vegas, Phoenix, and multiple parts of Texas. He has been on the Orange County Developers Advisory Board and at the State Level a participant in the Governmental Affairs Board and part of the selection committee for the Citizen Architect nominees. Ken holds a B. Arch from New York Institute of Technology and an MBA from Rollins College.

**Lisa Rovner, AIA****Director At Large (2 Year Term)**

Lisa Rovner is a licensed architect, in both New York and Vermont with over 35 years of experience in the fields of architecture, interiors, building information modeling and computer-aided design. She holds a B.S. in Architecture from the University of Virginia and an M. Arch. from Carnegie Mellon University. Lisa is thrilled to be a Sr. Project Architect with RLF, specializing in healthcare planning, design and construction. Previously, she was the owner of Rovner Architectural Designs, PLC, of South Burlington, VT for 26 years, which provided consulting services. She served as President of AIA Vermont in 2015, where she focused on bringing the issues of resiliency in architecture to the public domain.

**Alexander Straughn, AIA, NCARB****Director At Large (2 Year Term)**

Alexander Straughn, an Associate at SchenkelShultz Architecture, is an alumnus of the Orlando-based 2+2+2 program and ultimately received his Master of Architecture from the UF CityLab. He also earned his Bachelor of Architecture from the University of Central Florida and Associate of Arts from Valencia College as part of the program. Alexander began his career at SchenkelShultz as an intern and joined full-time four years ago. Throughout his tenure at the firm, he has garnered a specialization in aviation design and master planning for large transportation infrastructure, as well as becoming a Florida Registered Architect in 2021. He is currently an Adjunct Professor at Valencia State College. Alexander has participated in the Orlando Chapter of the Young Architects Forum (YAF).

Wayne Allred , PE, LEED AP

Allied Director (1 Year Term, Non-Voting Position)

I have been in the Orlando area for the last 25 years. I have been an electrical engineer with TLC for the entire time. During my time in Orlando I have had the privilege of working with many architects in the area and on many significant projects in the area. I currently lead a group of MEP engineers focused on commercial, education, hospitality, mixed-use, and energy services.

Amy Neuman

Allied Director (1 Year Term, Non-Voting Position)

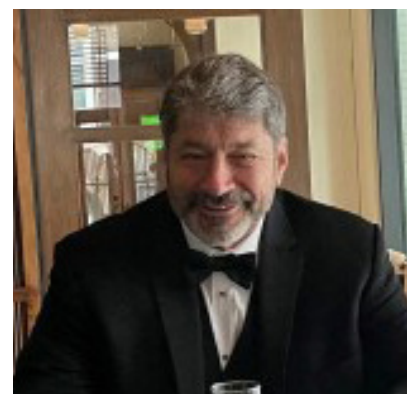

I believe as an Interior Designer and manufacturer Rep that supporting Architects is our key initiative. The more involved at all levels, the more successful we all are!

Bob Eckes

Allied Director (1 Year Term, Non-Voting Position)

19 Years as a manufacturer rep & 20 Years as FF&E dealerships and currently Architectural Product Project Executive at SHIFTT Interiors. Working with General Contractors, A&D and end users to provide turnkey solutions for interior buildout.

GUEST LECTURE – AIA AWARD RECIPIENT

PAUL MANKINS, FAIA, LEED AP

2022 AIA Award
for Excellence in
Public Architecture

Paul Mankins, FAIA, LEED AP
PRINCIPAL
substancearchitecture

ST. KILDA COLLECTIVE
Valley Junction, Iowa

Paul Mankins, FAIA, LEED AP is the founder of **substancearchitecture**; an award-winning architecture practice based in Des Moines, Iowa. He is widely regarded as one of the leading design practitioners in the Midwest. During the last three decades, he has directed the design of significant corporate, residential, civic and higher education projects recognized with over 130 design awards – including 70 awards from the American Institute of Architects (AIA).

To obtain CEU credit for lecture, please scan QR code on page 7.

LELY NORTH AMERICA
Pella, Iowa

These projects include the Principal Riverwalk Pavilion and Pump Station along the Des Moines River, the renovation of Eero Saarinen's Oron E. Scott Chapel at Drake University, the Student Innovation Center at Iowa State University, and Des Moines' New Central Library with David Chipperfield Architects of London. In addition, he taught architectural design at Iowa State University (ISU) from 1998 to 2013 and is a frequent academic and professional design awards juror nationwide.

In recognition of his contributions to the profession, Paul received the Design Achievement Award from Iowa State University in 1998, the Young Architects Award from the AIA in 2003, and in 2004 he was elected to the AIA's College of Fellows. In 2011, Paul was named a Richard Upjohn Fellow of the AIA for his efforts leading the Institute, and in 2013 he received AIA Iowa's Medal of Honor. Finally, in 2022 he was recognized with the AIA Award for Excellence in Public Architecture. He is just the 15th private-sector architect to be recognized in the thirty-year history of the award.

Orlando Foundation for Architecture

INSPIRING PEOPLE TO DISCOVER

The Orlando Foundation for Architecture's purpose is to promote public awareness, appreciation and enjoyment of the built environment, advocate for the preservation of historic architecture, demonstrate sustainable practices, offer scholarships for architectural education, and promote diversity in the architectural community.

The Foundation provides college scholarships to students that participate in the 2+2+2 program at Valencia College, UCF, and UF City-Lab Orlando.

Through educational programs, tours, exhibits, and events, the Orlando Foundation for Architecture promotes public understanding and appreciation of architecture and design. It inspires creativity and exploration of architecture, engineering, and design. Programs, exhibitions, and events take place at AIA Orlando and in schools and community sites throughout Central Florida.
